

SpiraPave®

Paver & Bearer Support

Creating Cities
Where Urban Meets Nature

Engineered in Australia

Our Innovation Your Solution

SpiraPave® pedestals are engineered to provide a versatile and cost-effective solution to support raised pavers and timber decking in an eco-friendly way. It provides a cavity for services to be concealed, improves heat and sound insulation and facilitates rapid surface drainage whilst allowing waterproofing and services to remain accessible.

Technical Specifications

Material	Recycled Polypropylene
Height Range ¹	12mm to 119mm
Ultimate Compressive Strength ¹	20kN
Base Diameter	154mm 172mm (with Slope Corrector)
Spacer Tab Height	15 / 25mm
Spacer Tab Thickness	2 / 3 / 4 / 5 / 6 / 10mm (gap between pavers)
Marginal Adjustments	1mm
Bearer Holder	35mm to 80mm (bearer width)
Biological / Chemical Resistance	Unaffected by moulds and algae Good resistance to alkali and bitumen

¹ varies with different combinations

SpiraPave®

SpiraPave® pedestal is based on a unique 'step' design for supporting raised pavers and timber decking. It creates a cavity to conceal services, improves heat and sound insulation, facilitates rapid surface drainage and allows easy access to waterproofing and services. It also reduces efflorescence and algae growth and reduces paving installation costs.

About SpiraPave®

SpiraPave® is a height and slope-adjustable pedestal engineered to support pavers and decking to reduce material, construction and lifecycle costs.

Height range of SpiraPave® is **12mm to 74mm**, in 1mm increments. Additional height of 45mm is obtained with the use of a SP-45E extender.

SpiraPave® is used in areas such as balconies, swimming pool surrounds and courtyards.

Accessories include top/bottom slope-correctors, spacer tabs, height extender, base plate and bearer holders.

*or Bearer Holder

Advantages

- Low minimum height of 12mm
- Precise 1mm height adjustment
- Top and/or bottom slope correctors

- Easy to install, cost effective and lightweight
- Made from 100% recycled materials
- Supports Green Building certification

SpiraPave® providing support for pavers

SpiraPave® providing support for timber decking

Construction Benefits

Low minimum height is ideal for installations where other height-adjustable pedestals are generally too high to be used.

Eliminates need for bedding sand or cement screed, reducing the load burden on building structures. It also reduces installation time and costs.

Joint sealants and/or grouting is rendered unnecessary and expansion and contraction of pavers do not result in unsightly cracks.

SpiraPave® may be used with VersiPave® or VersiJack® pedestals, as an accessory for additional height adjustments.

High Compressive Strength

SpiraPave® with Extenders up to 119mm has a compressive strength of **≥ 20kN**.

Supports Green Building Certification

SpiraPave® is manufactured from recycled materials which meet European Union RoHS requirements.

“Engineered to reduce material, construction and lifecycle costs.”

Distinctive Features

Minimum Height

12mm minimum height with 1mm stepped increments.

Slope Corrector

Used at top or bottom of pedestal for slope compensation of up to 5%.

Bearer Holder

Suitable for widths 35mm to 80mm to keep bearer firmly in place.

Extended Height

Additional 45mm height possible with use of SP-45E extender.

Stability

Desired height is secured with Steel Locking Pin.

NEW

Variable Angle Spacer Tab

Variable Angle Spacer Tabs allow pedestals to support up to 8 pavers with different corner angles.

SpiraPave® has international design registrations and patents pending.
