VersiDrain® Waterproofing System

elmich.com

VersiDrain® Waterproofing System is a tailored solution for efflorescence mitigation on surfaces such as stairs. Even with the many stair edges and corners, this system can be easily integrated and installed.

1 Bitulen® SK374 DUO

Self-adhesive, cold-applied 1.5 mm thick preformed waterproofing membrane made from cross-laminated SBS modified bitumen.

2 VersiDrain® EC

Low profile composite HDPE drainage sheet that enables entrapped water within the floor layers to be drained efficiently for efflorescence mitigation.

3 VersiTape® F100

Self-adhesive sealing tape comprising a butyl rubber compound and polypropylene fleece with high plasticity to conform to edges.
