

VJ Wall Spacer

Compressible Wall Buffer

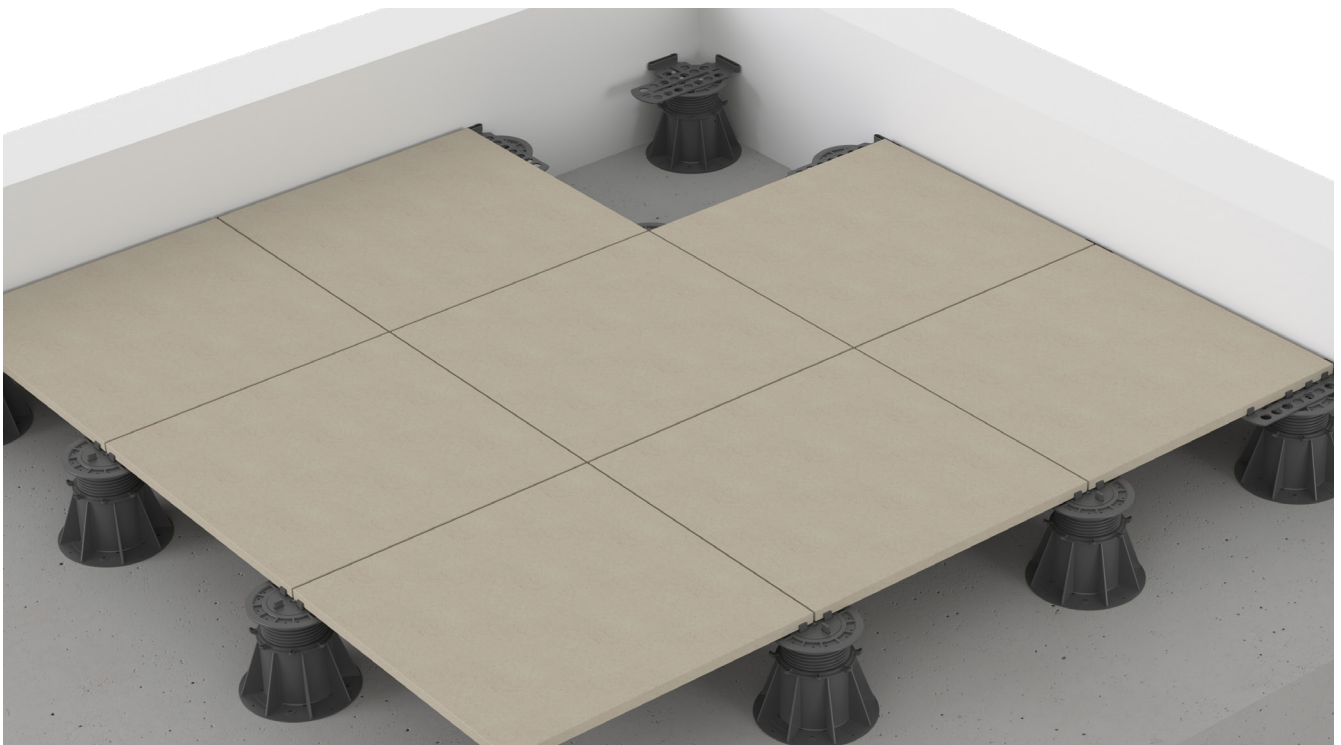

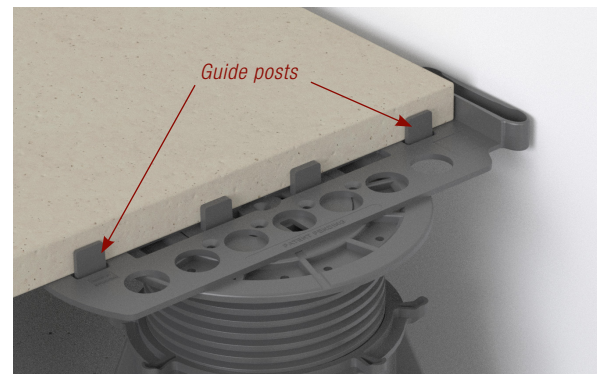

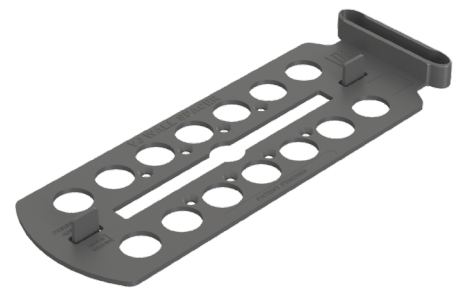

VJ Wall Spacer provides a permanent compressible buffer to prevent damage where pavers abut the wall. The gap created also facilitates drainage.

About VJ Wall Spacer

VJ Wall Spacer is used on VersiJack® pedestals to restrict lateral movement of pavers within a confined space and ensure a uniform gap along the perimeter of the raised floor.

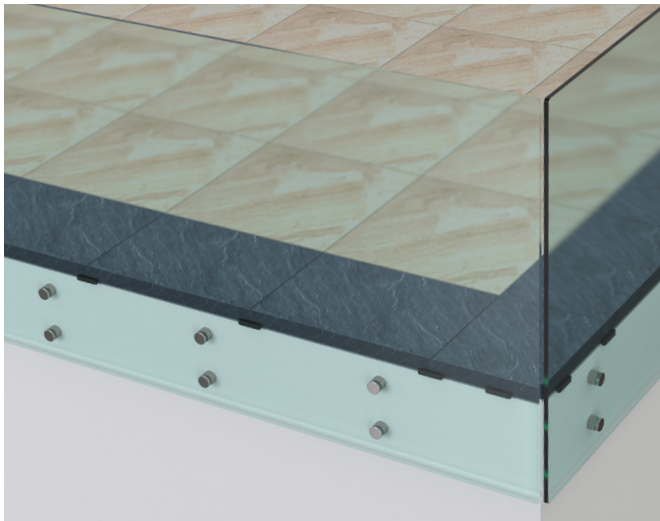

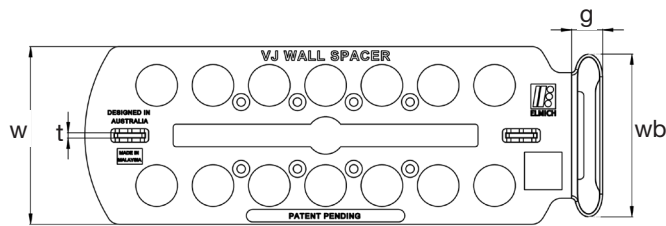

VJ Wall Spacer creates a compressible buffer between pavers and the wall to account for expansion and contraction under the elements.

Guide posts on the VJ Wall Spacer guide the pavers into position while Spacer Tabs on the pedestal determine the gap between pavers.

Technical Specifications

		G-10	G-15	G-20
Wall buffer (mm)				
- gap	g	10	15	20
- height	hb	15	15	15
- width	wb	74	78	84
Length (mm)				
Length (mm)	l	233	233	233
Width (mm)				
Width (mm)	w	85	85	85
Guide post (mm)				
- thickness	t	3	2, 3, 4	2
- height	hp	12	12	8
- width	wp	15	15	15

VJ Wall Spacer between pavers and glass balustrade

Advantages

- 1 Suitable for all paver types
- 2 Maintains a gap along the perimeter
- 3 Hidden below paver surface
- 4 Cost-effective and simple installation
- 5 Made from environmentally-friendly material

Gap between pavers and wall
