

# TurfPave® Markers

TurfPave® Markers are traffic guides that are plugged into the cells of TurfPave® XD with a push-fit design, providing a secure fit without requiring any tools. The Markers are raised for visibility and tapered to prevent trip hazards. The flexible placements of TurfPave® Markers offer designers the freedom to experiment with different shapes and patterns. The Markers can be used to create road markings, promote road safety, ensure smooth traffic flow, delineate parking limits, and restrict encroachment into designated emergency zones.

## TP-XD Accessway Reflector

TP-XD Accessway Reflector is a simple and effective snap on solution to demarcate fire engine accessways and driving lanes to guide motorists around hazards and keep them on the intended pathway. It houses a 100 x 100 mm road reflector that conforms to SCDF<sup>1</sup> guidelines and is durable and tamper-resistant.

## TP-XD Parking Bay Marker

TP-XD Parking Bay Marker is a clip-on marker used to create parking lots atop grass or gravelled areas that utilise TurfPave® XD. The Marker is manufactured with UV-stabilised plastic and comes in standard colours; white and yellow, with other colours subject to availability. The Markers may be used in temporary or permanent applications to design spaces for carparks, handicap lots and creating floor signages.
