

VJ Brace

Additional Stability For Extended Supports

We make the difference.
The Elmich Difference.

VJ Brace

VJ Brace is a bracing system designed for use in VersiJack® pedestal installations where additional lateral stability is desired. The VJ Brace system comprises of Brace Collars that are clamped around the VersiJack® screw threads, and connecting Brace Arms that are length adjustable and lockable. VJ Brace should be used for pedestals at heights in excess of 500 mm and/or to ensure the distances between pedestals are maintained during installation and replacement of pavers. The VJ Brace system is suitable for pedestals with centre-to-centre intervals of 470 to 700 mm. Other interval options are available on request.

The Elmich security hologram ensures authenticity of the products.
