

# DeckLink™

Hidden Fasteners for Conventional Deck Boards

ELMICH

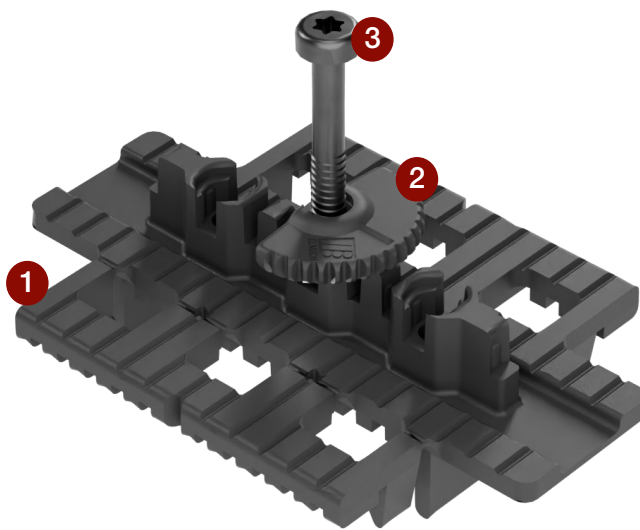

We make the difference.  
The Elmich Difference.

# DeckLink™

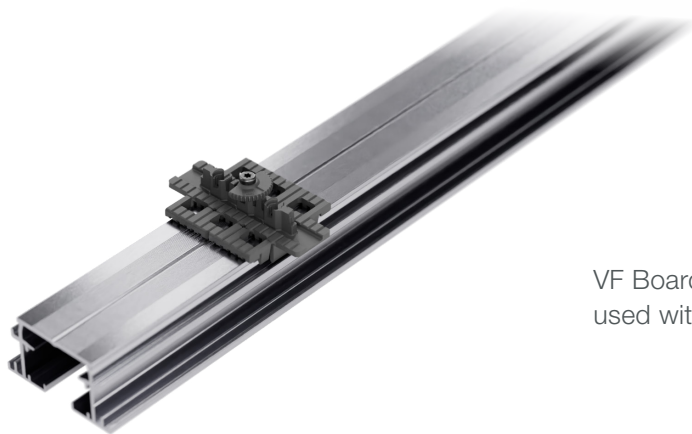

DeckLink™ is an invisible decking fastener with a screw and rotating catch for quick, easy installation and removal of deck boards. Specifically designed for decks utilising hidden fixings, it facilitates the easy removal or replacement of deck boards for maintenance and access to services beneath the deck.

## DeckLink™

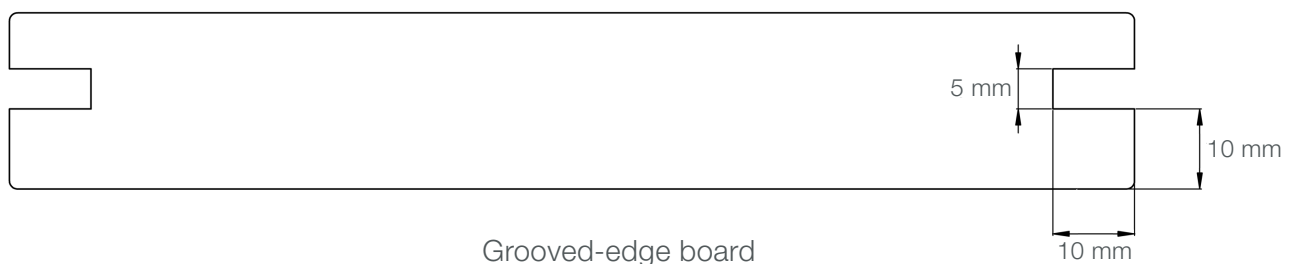

DeckLink™ comprises a VF Board Holder and a Fastening Disc to secure the grooved-edge deck boards in place, concealed beneath the surface for a seamless decking finish.

- 1 VF Board Holder
- 2 Fastening Disc
- 3 Steel Screw

VF Board Holders and Fastening Discs are used with VersiFrame® aluminium joists.

# Design Features

## Removable Boards

Boards are removed or replaced by turning the Fastening Disc through the gap between the boards.

## Abutting Boards

Twin Fastening Discs are used to secure abutting boards\* or to support a single deck board for additional stability.

*\*Boards with less expansion and shrinkage*

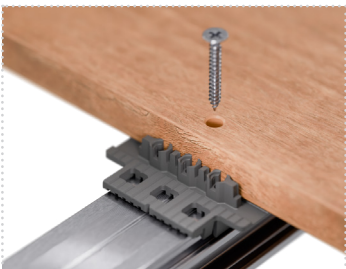

## End Board Holder

End clips are cut from DeckLink™ and used as both start and end clips.

## Conventional Fastening

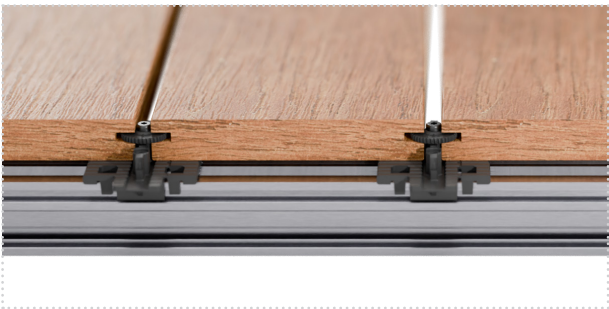

VF Board Holder includes cut-outs for screws to affix decking boards of any profile to joists.

# Advantages

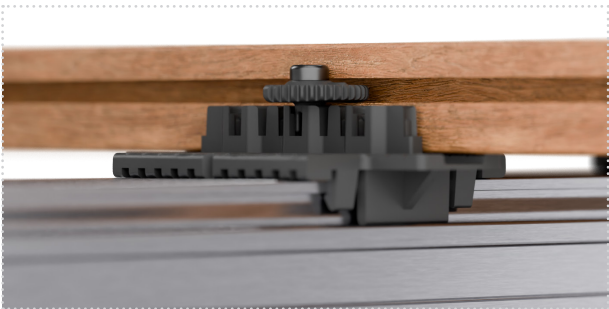

## Board Expansion & Contraction

DeckLink™ creates an 8 mm gap between boards to accommodate thermal expansion and contraction.

## Ventilation & Drainage

DeckLink™ creates a gap that provides airflow and drainage between the bearer and board, preventing moisture build-up, mould, and decay.

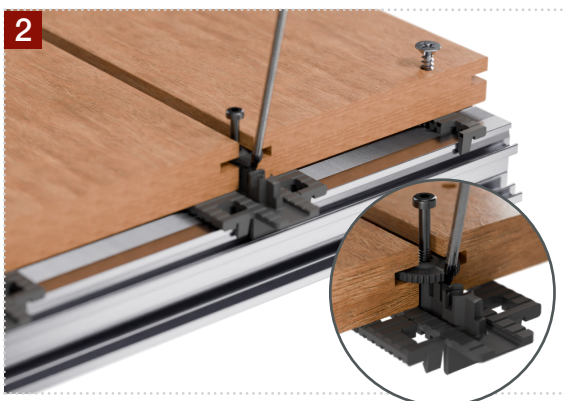

# Assembly

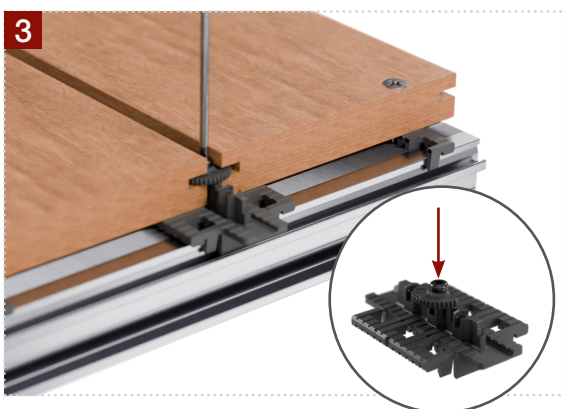

## Installation

Cut VF Board Holder for End Clip

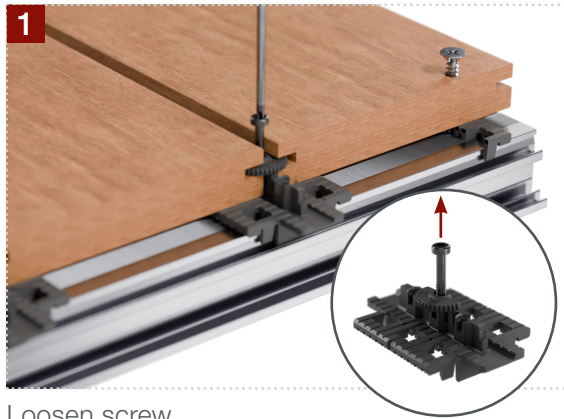

Fit board and rotate Fastening Disc

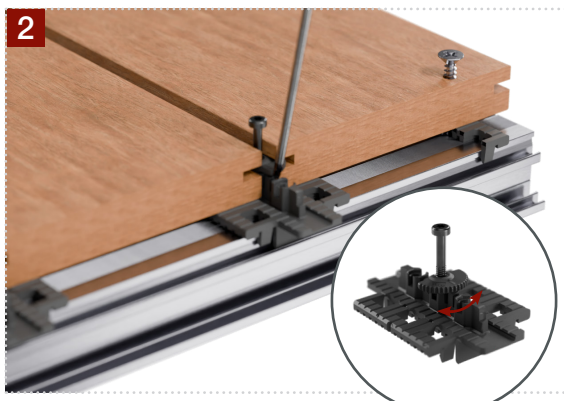

Fit all boards and tighten screw

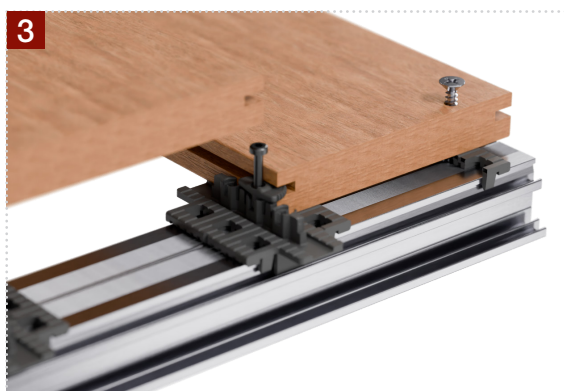

## Removal

Loosen screw

Rotate Fastening Disc

Remove individual boards
